Solechnik, N. Ya. and Alkin, V. P.
PROBLEMS CONCERNING THE DEFORMATION OF
PULP FIBRES AND PULP BEATING. [1960] 5p.
11 refs.

Order from OTS or SLA \$1.10 61-10680

Trans. of Bumazh[naya] Prom[yshlennost'] (USSR)
1959, v. 34, no. 12, p. 7-8.

DESCRIPTORS: *Wood pulp fibers, *Wood pulp, Me-
chanical properties, Processing.

Experiments showed that pulp undergoes the three
kinds of deformations which occur in high molecular
weight polymers: elastic, highly-elastic and plastic.
This indicates that the deformation of pulp during beat-
ing has a relaxation character. Therefore the correct
choice of the magnitude of the pressure and its fre-
quency of application is very important. The speed and
nature of beating depends largely on the ratio of the
various kinds of deformation inherent to the fibre.
